EDUCATION

BML Munjal University

2023 – 2027

Bachelor of Technology in Computer Science and Engineering

Gurugram, India

- **CGPA:** 7.33 / 10.0
- **Coursework:** Data Structures, Algorithms, Machine Learning, Database Management Systems

Radiant Stars English School

2022

Class XII (Senior Secondary)

Aligarh, India

- **Percentage:** 74.40%

Radiant Stars English School

2020

Class X (Secondary)

Aligarh, India

- **Percentage:** 83.33%

SKILLS

Languages : Python, Java (Data Structures & Algorithms)

Data Science & ML : NumPy, Pandas, Matplotlib, Seaborn, Scikit-Learn, Statistics

ML Concepts : Supervised & Unsupervised Learning, Classification, Model Tuning, Ensemble Methods

Tools & Concepts : Streamlit, Git, GitHub, JSON, Object-Oriented Programming (OOP)

PROJECTS

Heart Disease Prediction & Analysis

- Developed an end-to-end Machine Learning pipeline to predict heart disease risk, deployed as an interactive web application.
- Conducted comprehensive Exploratory Data Analysis (EDA) on a dataset of 918 patient records with 12 clinical features using Pandas and Seaborn.
- Trained and evaluated classification algorithms, applying model tuning techniques to achieve a predictive accuracy of 86.14%.
- **Links:** [Live Demo](#) | [GitHub Repo](#)

Bank Management System

- Developed and deployed a fully functional Bank Management application featuring both a Command Line Interface (CLI) and a modern Web GUI.
- Engineered a secure 4-digit PIN authentication system for all financial transactions.
- Implemented JSON-based data persistence and architected core logic using Python Object-Oriented Programming (OOP) principles for a modular and clean codebase.

ACHIEVEMENTS

DTU CryptoForge Hackathon: Secured **3rd Position** at Delhi Technological University for developing and pitching an innovative tech solution.

Problem Solving: Consistently built analytical logic by successfully solving **100+ Data Structures and Algorithms problems** in Java on LeetCode.
